Portfolio: purvanshi.netlify.app

TECHNICAL & PRODUCT LEADER

Developer focused on full-stack applications, modern web technologies, backend systems, and AI-native engineering. Experienced with building projects using React, Next.js, Python, TypeScript, Node.js, and Supabase. Interested in intelligent systems, developer tooling, automation, and product-focused engineering. Currently learning and building in AI engineering through hands-on projects and experimentation.

TECHNICAL SKILLS

Programming: Python, JavaScript, Node.js, TypeScript, C++, C

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js

Databases: Supabase

Cloud & DevOps: Docker

PROJECTS

Memora — AI Memory & Productivity System

Personal relationship intelligence platform designed to help users remember people, conversations, interactions, and social context through structured memory capture and visual relationship mapping.

- Built using Next.js, TypeScript, Supabase, and Tailwind CSS
- Developed structured memory logging and contextual people profiles
- Implemented relationship graph visualization between users and connections
- Built conversational memory capture flows and searchable interaction history
- Designed a clean productivity-focused interface with graph and insight views
- Added contextual prompts and conversation suggestion systems

Tech Stack: *Next.js, TypeScript, Supabase, Tailwind CSS*

Narrative Control Analyzer

Tool that analyzes how emotional language and narrative framing influence reader perception across different media sources reporting the same event.

- Compared emotional tone and framing between two articles
- Analyzed narrative bias, emotional intensity, and reader perception patterns
- Generated insights into how media framing shapes understanding
- Built visual emotional indicators and comparison-based analysis workflows
- Integrated Google Gemini for narrative and emotional analysis

Tech Stack: *Google Gemini API, Node.js, Express.js, HTML, CSS, JavaScript, Firebase*

EDUCATION

B.Tech | Manipal University Jaipur - CS Major
